

# Argentina Seismic Programs

Coverage includes areas in the 2018 and 2019 bid rounds

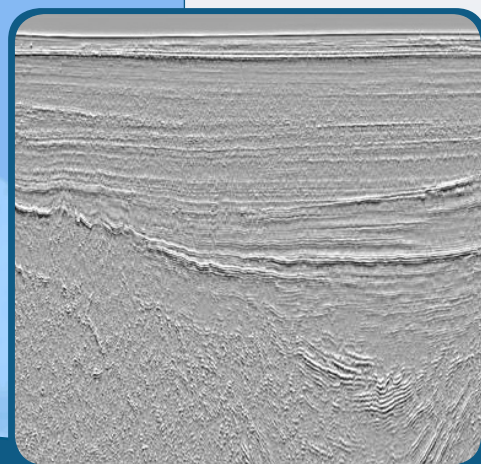

Offshore Argentina presents some of the year's most promising exploration opportunities. Spectrum's Multi-Client library now includes over 50,000 km of newly-acquired data over the Austral Malvinas and Argentine Basins.

Our modern, premium, long-offset seismic data is processed and ready to give explorers the competitive advantage in unlocking these exciting new areas. Both surveys were acquired with 12,000 m offsets and continuous recording to enable extended recording lengths and high fold data to support full interpretation.

This new data covers all areas in the upcoming licensing rounds.

Argentina Basin: 38,000 km

Austral Malvinas: 14,000 km

## Technical Information

Survey Parameters	
Streamer Length	12,000 m
Grid Spacing	20 km x 20 km
	10 km x 10 km
Record Length	15 s
Shot Point Interval	25 m
Group Interval	12.5 m
Sample Rate	2 ms

Survey	Survey Size	Acquisition complete	Processing complete
Argentina Basin North	21,000 km	October 2017	May 2018
Austral Malvinas	14,000 km	February 2018	July 2018
Argentina Basin South	17,000 km	June 2018	January 2019
